

Dairy 20% Pellet

Product Description:

Woods Dairy 20% Pellet is a grain based pelletised supplement designed to complement pasture grazed or conserved forages and by-products being fed in a TMR or partial TMR situation to lactating dairy cows. It provides starch, sugars, rumen degradable proteins, minerals, vitamins and the rumen modifier Monensin.

This product is composed of milled grains, protein meals/seeds (soybean meal, cotton seed meal, canola meal, faba beans, chickpeas and/or mung beans), macro-minerals, trace minerals and vitamins.

Typically, **Woods Dairy 20% Pellet** contains 33mg/kg Monensin (Rumensin®) sodium, a rumen modifier that helps against coccidiosis and improves feed conversion.

Feeding Guidelines:

Supply **Woods Dairy 20% Pellet** daily in dairy bails or mixed with forages and by-products at recommended rates by a qualified nutritionist.

Suggested daily intake between 4 and 10kg per head depending on stage of lactation, quality and quantity of paddock or conserved forage available. Consult your nutritionist on feeding rates per milk.

Ensure animals have plenty of fresh clean water available for drinking at all times.

Typical Result* - Dry Matter Basis

Analytical Data	Result
Crude Protein	20.03%
Moisture	11.0%
Crude Fibre	9.09%
NDF	18.66%
Fat	3.33%
Starch	45%
Calcium	1.44%
Phosphorus	0.40%
Metabolisable Energy	12.02MJ/kg
Sulphur	0.20%
Magnesium	0.71%
Sodium	0.40%
Monensin	33.3mg/kg
Vitamin A added	11099IU/kg
Vitamin E added	27.75mg/kg

DISCLAIMER : There may be variations of composition depending on seasonal conditions and raw materials. The specifications are given as a general indication only of a typical analysis. Shelf life of this product is limited. It is recommended that the product be consumed within a 3-6 month period.
