

Product Description:

Woods Ruminant All Rounder Nut is a medicated stock feed suitable for all cattle over 200kg live weight and all sheep over 15kg live weight as a backgrounding supplement in conjunction with pasture, hay or silage. This pellet can also be limit fed to breeders and bulls, and ewes and rams as a supplement to forage available.

This product can come in a 5mm pellet or 9mm nut. This nut is composed of milled grains, protein meals/pulse seeds, fibre and other food by-products (hulls, millrun, biscuit meal, etc.), macro-minerals, trace minerals and vitamins.

Typically, **Woods Ruminant All Rounder Nut** contains 33mg/kg Lasalocid sodium, a rumen modifier that helps improve feed conversion.

Feeding Guidelines:

Animals that have not been accustomed to grain feeding must be introduced gradually or it may cause bloat, rumen acidosis and/or possible death.

Before supplying this medium high grain ration, preferably feed cattle or sheep palatable grass/cereal hay for 1 or 2 days to ensure rumen fill and adequate rumination. Depending on amount and quality of forage (pasture, hay or silage) available, supply between 1 to 2% of live weight to backgrounding young cattle or cows and bulls, and weaned lambs or ewes in troughs, or limit access self-feeders.

For cattle and sheep going into feedlot, provide **Woods Ruminant All Rounder Nut** free access in troughs or self-feeders for first 10 to 14 days prior to changing to **Woods Beef Finisher Pellet** or **Woods Sheep Finisher Pellet**.

Typical Result - Dry Matter Basis

Analytical Data	Result
Crude Protein	13.98%
Moisture	11%
Crude Fibre	18.35%
NDF	30.10%
Fat	2.75%
